

“IP and Green Tech” webinar with IPsoc

Wednesday 16 February 2022, 6-7pm

COP26 was an important step forward in global efforts to address climate change and to reduce carbon emissions. The continued development of green technologies is vital to meeting these goals. In the near future IP lawyers will no doubt find themselves advising on both obtaining and enforcing IP rights in green technologies.

[Gideon Shirazi](#), [Quentin Tannock](#), and [Laura Wright](#) will be speaking at a session, run by IPsoc, covering the following:

- The key IP rights that can be used to protect green technologies;
- Strategic considerations in disputes relating to trade secrets; and
- Practical points to be aware of when licensing green tech.
